TO Student Activities Community

FROM (Sgd.) Nathaniel Paul T. Reyes
Director

SUBJECT Student Activities Payment System (SAPS) Mobile Application

The Office of Student Activities has always believed in harnessing technology to make it work for us in the most positive and empowering way. This is especially true when we recognize opportunities that can ease the way we do business and bring greater convenience to the everyday transactions of our student organizations.

In our continuing effort to promote innovation and to enhance the student activities experience, we are happy to announce the launch of the **Student Activities Payment System (SAPS) Mobile Application**. The **SAPS App** is available for use by all SAPS Originators and Approvers. This includes Organization Finance Officers and their deputies, Organization Presidents/Heads, and Organization Moderators. With the SAPS App, processing, approving, and monitoring of student activities financial transactions become faster, more efficient, and accessible right in the palm of your hand. This means users no longer need to open SAPS using a mobile browser. Just sign in using your SAPS credentials and you're good to go.

The SAPS App is available on both iOS and Android devices and is ready for download starting today. For questions, concerns, or more information, please get in touch with Ms. Julie Manalang, OSA Administrative Supervisor and Officer for Budget and Finance.

We hope that this new tool makes your work a little lighter so that org life will be more fun and fulfilling. The only way we can move forward together is if we help clear the path for each other. Here's to brighter days ahead.
